

2019 IMBS Jean-Claude Falmagne Dissertation Award

Congratulations to this year's winner, Santiago Guisasola!

Santiago Guisasola receives this year's award for his dissertation, "Towards a Mathematical Theory of Group Creativity and Collaboration." Santiago received his bachelor's degree in mathematics from University of Central Florida in 2012. From UC Irvine, he earned his Ph.D. in mathematical behavioral sciences in Fall 2018. His dissertation provides a platform for studying group creativity and removes many mathematical obstacles that, in the past, have hindered carrying out such a program. Santiago is currently a postdoctoral researcher at the Instituto de Matematica Pura e Aplicada in Rio de Janeiro, Brazil.
